One event: S as picked minus S shifted by +0.27 s
Same, one of the two solutions within 0.1 km of the 15 km boundary
Mean over the events (± standard error)
±1σ of the P+S location (S as picked), for scale
All stations: depth change
Mean +0.07 ± 0.05 km; 5 of 11 shallower
Depth change (km, − = shallower)
All stations: origin-time change
Mean -0.111 ± 0.005 s
Origin-time change (s, − = earlier)
All stations: horizontal distance
Mean 69 ± 10 m
Horizontal distance (m)
Stations within 35 km: depth change
Mean -1.61 ± 0.01 km; 11 of 11 shallower
Depth change (km, − = shallower)
Stations within 35 km: origin-time change
Mean +0.096 ± 0.006 s
Origin-time change (s, − = earlier)
Stations within 35 km: horizontal distance
Mean 240 ± 60 m
Horizontal distance (m)
Event number (as in Figure D)
Event number (as in Figure D)
Event number (as in Figure D)
