
680 common events against LDEO (679 for NCEDC DD). P1n, P1a0, P1d1 and P1pos re-use P1's correlations. Settings of every run: section 1.1 (P0n/P1n: nearest-neighbor pairs, absLocConstraint 0.3, damping 0.01; P0a0/P1a0: absLocConstraint 0, damping 0.01; P0d1/P1d1: absLocConstraint 0, damping 1; others: absLocConstraint 0.3, damping 0.01). Absolute positions of these runs differ by kilometers (Figure 7); this figure compares only the shape.
